DETAILED ACTION

The final Office Action dated 3/18/08 is hereby withdrawn in favor of the following final Office Action.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 71-75, 77-88, 102-107, and 109-121 are rejected under 35 U.S.C. 102(e) as being anticipated by Daugherty, Jr. (US 5,990,695).

Re claims 71-75, 77-86, 105, 107, 110-113, 116-121: Daugherty discloses that adjusting by selectively adjusting 48s, turning either clockwise (push) or counterclockwise (pull), adjusts the shape of 38s in turn changes the orientation of the probes without contacting the one or more devices to be tested. 48s are actuators.

By considering two opposite or adjacent 38s as a fist substrate (other two opposite or adjacent 38s as a second substrate), one 38 is a central region and another 38 is a peripheral region. By adjusting each corresponding 48, turning either clockwise (push) or counterclockwise (pull), to each 38, the central region and the peripheral region will have a plurality of forces and have different forces acting on to each region (either pull or push force; this is applied to other two opposite or adjacent 38s). This application of forces can be equally applied to other two opposite or adjacent 38s as a second substrate using their corresponding 48s. Further, all 48s can

Application/Control Number: 09/527,931 Page 3

Art Unit: 3726

be adjusted independently to its corresponding substrates to provide either push or pull forces.

This impartes

Fig. 3 shows a plurality of probes comprises a first array of probes (five (5) 18s congregated together in Fig. 3 or five (5) 18s together with any one of the other three (3) 18s) and a second array of probes (three (3) 18s opposite to five (5) 18s or three (3) 18s opposite to five (5) 18s together with any one of the other two (2) 18s or five (5) 18s).

Re claims 87-88: Fig. 3 shows a plurality of probes comprises a first array of probes (five (5) 18s congregated together in Fig. 3 or five (5) 18s together with any one of the other three (3) 18s) and a second array of probes (three (3) 18s opposite to five (5) 18s or three (3) 18s opposite to five (5) 18s together with any one of the other two (2) 18s or five (5) 18s).

18s are elongate and resilient (46) to comply with the shape of 19F.

Re claims 102, 104: see Fig. 1.

Re claim 103: as shown in the state of Fig. 1, 48s do not move devices to be tested.

Re claim 106: each 48 applies a plurality of forces to a plurality of regions of each 38.

Re claims 109, 114-116: 22 is a reference to structure to both first and second substrates.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claim 108 rejected under 35 U.S.C. 103(a) as being unpatentable over Daugherty, Jr. (US 5,990,695).

Daugherty discloses that 20 and 26(28) can take other shapes for instance circular (col. 4, lines 28-29).

At the time the invention was made, it would have been an obvious matter of design choice to a person of ordinary skill in the art to shape 20 and 26(28) such as curved or circular towards the device to be test to impart curvature to the surface during adjusting.

Therefore, it would have been an obvious matter of design choice to modify Daugherty to obtain the invention as specified in claim 108.

Response to Arguments

5. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

Interviews After Final

6. Applicant note that an interview after a final rejection must be submitted briefly in writing the intended purpose and content of the interview (the agenda of the interview must be in writing). Upon review of the agenda, the Examiner may grant the interview if the examiner is convinced that disposal or clarification for appeal may be accomplished with only nominal further consideration. Interviews merely to restate arguments of record or to discuss new limitations will be denied. See MPEP 714.13 and 713.09.

Conclusion

7. Please provide reference numerals (either in parentheses next to the claimed limitation or in a table format with one column listing the claimed limitation and another column listing corresponding reference numerals in the remark section of the response to the Office Action) to all the claimed limitations as well as support in the disclosure for better clarity (optional).

Art Unit: 3726

Applicants are duly reminded that a full and proper response to this Office Action that includes any amendment to the claims and specification of the application as originally filed requires that the applicant point out the support for any amendment made to the disclosure, including the claims. See 37 CFR 1.111 and MPEP 2163.06.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rick K. Chang whose telephone number is (571) 272-4564. The examiner can normally be reached on 5:30 AM to 1:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David P. Bryant can be reached on (571) 272-4526. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would

like assistance from a USPTO Customer Service Representative or access to the automated

information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
